Customer-Facing Pages

/ (Home / Menu)

PUBLIC

GET

PWA

Menu Catalog — Homepage

Primary landing page and product discovery surface. Displays the full menu organized by categories. Entry point for all customer journeys.

Category navigation tabs: Salads, Soups, Curries, Wok, Specialty, Noodles, Rice, Desserts, Beverages

Product cards with image (WebP), name, price in MVR, short description

Quick-add to cart inline or navigate to product detail

Dynamic open/closed banner with preorder prompt

Sticky category filter bar on scroll

Out-of-stock items shown as unavailable (admin-controlled)

Lazy-loaded product images for performance

FR-MEN-001

/product/{slug}

PUBLIC

GET

Product Detail Page

Individual dish detail view. Communicates the artisanal, scratch-cooked nature of each dish with full ingredient and preparation context.

Full-size product image with preparation/ingredient photography

Complete description including authentic technique notes (e.g., mortar-and-pestle, fresh galangal)

Unit price in MVR

Product variants selector (e.g., spice level: mild / medium / hot)

Add-on items selector (e.g., extra jasmine rice, additional sides)

Quantity stepper (+/-)

Add to Cart CTA button

Allergen / dietary notes section

Breadcrumb navigation back to menu

FR-MEN-006

FR-MEN-007

FR-MEN-008

/cart

PUBLIC

GET

Shopping Cart

Order staging area. Allows review and modification of all added items before proceeding to checkout.

Line item list: name, unit price, quantity stepper, line total

Remove item button per line

Running subtotal and grand total in MVR

Empty cart state: illustration + "Continue Shopping" CTA

Closed-restaurant banner: "We're currently closed, but you can still preorder!" with Preorder Now CTA

Order notes field (spice preference, allergies)

Proceed to Checkout CTA → redirects to /login if unauthenticated

POST

OTP Authentication

Passwordless login via SMS OTP. Maldivian +960 mobile numbers only. Auto-creates account on first successful verification.

Phone number input pre-filled with +960 country code prefix

"Send OTP" button triggers SMS via gateway

OTP code input field (6-digit, 5-minute validity)

Countdown timer showing OTP expiry

Resend OTP option (rate-limited: max 5/hour)

Auto-enrollment on first login (new account created silently)

Post-login redirect to originating page (cart / reservations / checkout)

Table Reservation

Core differentiating feature. Manages the exclusive 3-table dine-in booking experience. Enforces hard capacity constraints at all times.

Date picker (available dates highlighted, past dates disabled)

Time slot selector aligned to lunch (11:30-15:30) and dinner service windows

Real-time availability indicator: available slots shown; full slots greyed out

Party size selector (integer, 1-N)

Special requests / dietary notes text field

Customer name pre-filled from account profile

Booking confirmation screen with unique reservation ID

Confirmation SMS dispatched automatically

Unauthenticated users redirected to /login

FR-RES-001

FR-RES-002

FR-RES-009

/checkout

AUTH REQUIRED

POST

Order Checkout

Multi-step checkout flow converting cart to confirmed order. Supports delivery via Foodie app and preorder scheduling.

Step 1 — Fulfillment: Delivery address input (within Malé service area)

Step 2 — Schedule: Immediate or preorder time selection

Step 3 — Payment: Cash on delivery / Bank transfer / Online payment (BML gateway)

Order summary panel: line items, subtotal, delivery fee, GST, final total in MVR

Special instructions / order notes field (spice, allergies)

Order confirmation screen with unique order ID on placement

Confirmation SMS to registered phone number

Preorder indicator when outside operating hours

FR-ORD-001

FR-ORD-003

FR-ORD-004

FR-ORD-005

FR-ORD-010

FR-ORD-011

FR-ORD-012

/orders

AUTH REQUIRED

GET

Order History & Tracking

Customer's complete order ledger with live status tracking for active orders.

Active orders section: real-time status indicator (Received → Confirmed → Preparing → Out for Delivery → Completed)

Past orders list: date, items summary, total, status

Order detail expand: full line items, delivery address, payment method, notes

Reorder shortcut (re-populates cart with prior items)

Empty state for new customers

FR-ORD-013

FR-ORD-014

/account

AUTH REQUIRED

GET

Account Dashboard

Customer profile and activity hub. Central access point for order history, reservation history, and account management.

Customer profile: name (editable), registered phone number

Quick-access cards: active orders, upcoming reservations

Order history summary with link to /orders

Reservation history: past and upcoming bookings

Cancel upcoming reservation action (≥ 1 hour notice)

Logout button (destroys session token)

FR-AUTH-008

FR-RES-007

02

Admin Panel Routes (/admin/*)

/admin/dashboard

ADMIN

GET

Analytics Dashboard

At-a-glance operational overview with key business metrics and live activity feed.

Daily / weekly / monthly revenue, order count, average order value

Top-selling items ranked by order frequency

Active customer count

Live order queue widget with status indicators

Today's reservation occupancy (X/3 tables)

Reservation analytics: occupancy rate, peak booking times, cancellation rate

Exportable financial reports (CSV) for GST compliance

FR-ADM-013

FR-ADM-014

FR-ADM-015

/admin/orders

ADMIN

GET

PATCH

Order Management

Live order queue and full order lifecycle management for kitchen and admin staff.

Real-time incoming order feed with audio + visual notification alerts

Kanban-style pipeline: Received → Confirmed → Preparing → Ready → Out for Delivery → Completed

One-tap status advancement per order

Order detail panel: line items, delivery address, notes, payment method

Cancel / refund order with reason field

Search and filter: date range, status, customer phone, fulfillment type

Manual order creation (for phone/WhatsApp orders)

FR-ADM-004

FR-ADM-005

FR-ADM-006

FR-ADM-007

/admin/reservations

ADMIN

GET

PATCH

Reservation Management

Full reservation calendar and capacity management. Critical for enforcing the 3-table constraint.

Calendar view: day / week — each slot shows table occupancy (0/3, 1/3, 2/3, FULL)

List view with upcoming reservations sorted by date/time

Confirm / modify / cancel any reservation

Manual reservation creation on behalf of customer (phone channel)

Mark reservation as No-Show (≥ 15 min past reserved time)

Admin override: bypass capacity constraint for special arrangements

Table assignment per reservation (Table 1 / 2 / 3)

FR-ADM-008

FR-ADM-009

FR-ADM-010

FR-RES-007

/admin/menu

ADMIN

GET

POST

Menu Management

Full CRUD control over the product catalog. Critical for daily ingredient-based availability updates.

Product list with inline availability toggle (e.g., Som Tam sold out today)

Create / edit product form: name, description, price (MVR), category, image upload, variants, add-ons

Category management: create, reorder, activate/deactivate categories

Bulk enable / disable items (e.g., end-of-day sold-out sweep)

Product sort order drag-and-drop within categories

Image upload with WebP conversion and CDN storage

Delete product (soft delete, preserves order history references)

FR-ADM-001

FR-ADM-002

FR-ADM-003

/admin/schedule

ADMIN

GET

PUT

Operating Hours & Schedule

Bifurcated schedule configuration for the split lunch / dinner service model.

Per-day operating hours matrix: lunch window, dinner window, closed

Toggle individual service windows (e.g., disable dinner on specific days)

Special closure dates (Islamic holidays, inventory days)

Temporary schedule override: close early / open late on a specific date

Reservation time slot generation rules (slot interval, last booking cutoff)

Live preview: "How the banner appears to customers right now"

FR-ADM-011

FR-ADM-012

BR-001

BR-004

/admin/customers

ADMIN

GET

Customer Records

Read-only customer registry for operational and support use.

Customer list: phone number, name, registration date, last active date

Customer detail: full order history, reservation history

Account status management: Active / Suspended / Deleted

Search by phone number or name

Order

cou

and

lifetime

FR-ADM-013

NFR-SEC-005

/admin/settings

ADMIN

GET

PUT

System Settings

Platform-wide configuration and business rules management.

Delivery service area boundary configuration (Malé zones)

Minimum order value for delivery (configurable)

GST display toggle (inclusive / exclusive)

Payment method enable/disable (Cash / Bank Transfer / Online)

SMS gateway configuration and test OTP dispatch

Admin user management: create staff accounts, assign RBAC roles

Reservation settings: max party size, cancellation window (default 1hr), reminder timing

03

Key User Journeys

Place a Delivery Order

1

Browse Menu

Guest or authenticated user lands on homepage, browses by category
/ (Home)

2

View Product

Tap dish to view detail, select variants / add-ons, set quantity
/product/{slug}

3

Add to Cart

Item added; continue shopping or proceed to cart
/cart

4

Authenticate

If not logged in: enter +960 number → receive OTP → verify → session created
/login

5

Checkout

Enter delivery address, select payment, review summary, confirm order
/checkout

6

Confirmation + Track

Order ID shown, SMS confirmation sent, live status tracking available
/orders

Book a Table

- 1 Navigate to Reservations**
Customer taps Reservations in nav; redirected to /login if unauthenticated
/reservations
- 2 Select Date**
Calendar picker; available dates highlighted; fully-booked dates greyed
/reservations
- 3 Select Time Slot**
Slots shown for lunch / dinner service. Full slots (3/3 tables) disabled
/reservations
- 4 Enter Party Details**
Party size, name (pre-filled), special requests / dietary notes
/reservations
- 5 Confirm Booking**
System checks capacity; assigns table; displays reservation ID
/reservations
- 6 SMS Confirmation + Reminder**
Confirmation SMS sent immediately; reminder SMS sent 2 hours before slot
SMS Gateway

Admin — Process Order

- 1 New Order Alert**
Audio + visual notification fires in admin panel for incoming order
`/admin/orders`
- 2 Confirm Order**
Staff reviews line items, notes, delivery address → advances to Confirmed
`/admin/orders`
- 3 Prepare**
Kitchen begins cooking; status advanced to Preparing
`/admin/orders`
- 4 Ready / Hand to Rider**
Food packed; status advanced to Out for Delivery; Foodie rider notified
`/admin/orders`
- 5 Mark Completed**
Delivery confirmed; order marked Completed; status update SMS to customer
`/admin/orders`
- 6 Analytics Updated**
Revenue, order count, top items metrics updated in dashboard
`/admin/dashboard`

04 RESTful API Endpoints

MENU & PRODUCTS

GET	<code>/api/v1/menu</code>	Full menu with categories
GET	<code>/api/v1/menu/categories</code>	Category list
GET	<code>/api/v1/products/{slug}</code>	Product detail
POST	<code>/api/v1/admin/products</code>	Create product
PUT	<code>/api/v1/admin/products/{id}</code>	Update product

PATCH	/api/v1/admin/products/{id}/availability	Toggle availability
DELETE	/api/v1/admin/products/{id}	Soft-delete product

AUTHENTICATION

POST	/api/v1/auth/otp/send	Send OTP to +960 number
POST	/api/v1/auth/otp/verify	Verify OTP → issue session
POST	/api/v1/auth/logout	Destroy session
GET	/api/v1/auth/me	Current user profile
PUT	/api/v1/auth/profile	Update profile name

CART & ORDERS

GET	/api/v1/cart	Get current cart
POST	/api/v1/cart/items	Add item to cart
PUT	/api/v1/cart/items/{id}	Update item quantity
DELETE	/api/v1/cart/items/{id}	Remove cart item
POST	/api/v1/orders	Place order from cart
GET	/api/v1/orders	Customer order history
GET	/api/v1/orders/{id}	Order detail + status
PATCH	/api/v1/admin/orders/{id}/status	Advance order status
POST	/api/v1/admin/orders/{id}/cancel	Cancel / refund order

RESERVATIONS

GET	/api/v1/reservations/availability	Available slots by date
POST	/api/v1/reservations	Create reservation
GET	/api/v1/reservations/mine	Customer's reservations

DELETE	/api/v1/reservations/{id}	Cancel reservation
GET	/api/v1/admin/reservations	All reservations (admin)
PATCH	/api/v1/admin/reservations/{id}	Confirm / modify / no-show
POST	/api/v1/admin/reservations	Manual reservation creation

SCHEDULE & SETTINGS		
GET	/api/v1/schedule	Current hours + open/closed
PUT	/api/v1/admin/schedule	Update operating hours
POST	/api/v1/admin/schedule/overrides	Special closure override
GET	/api/v1/admin/settings	Platform settings
PUT	/api/v1/admin/settings	Update settings

ANALYTICS & REPORTS		
GET	/api/v1/admin/analytics/summary	Revenue + order KPIs
GET	/api/v1/admin/analytics/top-items	Best-selling dishes
GET	/api/v1/admin/analytics/reservations	Occupancy + booking stats
GET	/api/v1/admin/reports/export	CSV export for GST
GET	/api/v1/admin/customers	Customer registry

permissions	JSONB (RBAC)	

06 External Integrations

SMS Gateway

Third-party SMS provider for Dhiraagu & Ooredoo (+960) networks. Handles OTP delivery, order confirmations, status updates, reservation confirmations, and 2-hour reminder alerts.

OUTBOUND

ASYNC

BML Payment Gateway

Maldivian Bank of Maldives online payment API for card processing in MVR. Supports authorization, capture, and refund. PCI DSS compliant. Optional — cash and bank transfer also supported.

BIDIRECTIONAL

PCI DSS

Foodie App

Primary delivery platform for Malé. Integration may be API-based (automated order ingestion) or manual (staff-managed tablet). Future roadmap: full API-based order sync to eliminate manual step.

INBOUND ORDERS

API / MANUAL

Phone / WhatsApp

Parallel manual channel via +960 789 2616. Table reservations and inquiries accepted by call or WhatsApp. Staff manually enter these into the admin reservation panel.

MANUAL ENTRY
